Subject: RE: Pristine Trust - Proposed Change to MNA Pilot Study

Hi Scott,

No I have not. Their proposal does not meet the requirements. They must install wells and provide designed pumping rates which control or reduce the contaminated plume and its movement.

I intend to submit a response next week and will send it to you in draft so you can provide Ohio EPA's prospective.

Thanks,
David

Hello David. Just checking in. Did you ever approve the Proposal for MNA Pilot Program Amendment submitted by The Pristine Trust (attached)?

I hope all is going well.

-Scott

Subject: Pristine Trust - Proposed Change to MNA Pilot Study

David,

In response to your email to me on April 6, 2018, attached is a letter from the Pristine Trustees containing the proposed change to the MNA Pilot Study at the Pristine Site to initiate groundwater gradient control for the off-site 1,2-DCA plume as discussed at our meeting on February 6, 2018. A signed copy of the letter will also be sent to you and the addresses for your files.

Let me know if you have any questions. Thank you.

Ron
